Goal is a co-location of; students with disabilities, learning services, and curriculum & student success initiatives. Striving for resources for disabled students with facilities designed specifically for them. Other goals; intellectually exciting courses, advising, improved programs, an increased graduation rate from 6% to 7%. Questions posed and discussion ensued.

Problems outlined; sunken floors in the basement, walls, acoustical boards in classrooms, HVAC system leaks, tiles have fallen on students, crumbling steps, additionally CSU preview takes place in this building which is problematic for student recruitment. This remodel will be beneficial campus wide due to the large amount of All-University classrooms.

C. Keith Belk, Professor of Animal Sciences, presented the Animal Sciences project proposal on behalf of Dr. Craig Beyrouthy, Dean of College of Agricultural Sciences. Estimated cost of \$20 million with 13,000 new sq. ft. and renovation of 41,000 current sq. ft. currently student numbers are declining due to inadequate facilities. This is one of the two largest industries in Colorado, and this discipline alone brings in \$7-9 million annually. Kris McKay, assistant director of development, discussed numbers with committee; request is for a portion of the total cost as they are anticipating large donor contributions once the project has been set in motion. Student, Eric Wellman, added to the need for UFFAB funding. Questions posed and discussion ensued.
